Re: Bellingham Street Course Revision

Dear Ms. Gobo-

Grindline has chosen to revise the street course design for the Bellingham Phase 2 skatepark. We have taken opportunity of the fact that bidding has been delayed for over a year on this project to update the design. Our revised design incorporates several changes that are based on comments we've received from local Bellingham skaters, as well as inspiration from the continuing evolution of skatepark design principles.

Our new concept is tailored to engage and challenge both beginner and more advanced "street skaters". Smaller kids will be able to learn the basics of skateboarding in this course, and adult skaters will be able to occupy themselves with the more challenging elements.

Respectfully submitted,

J. Chris Hildebrand, General Manager  
Grindline Skateparks, Inc.
