

How Do I Add More Time?

With your original receipt:

1

Press any key to "wake" the unit from power save mode.

2

Using the key pad, enter your space number, then select "2" to Add Time.

3

Enter the "Add Time" code shown on your original receipt.

4

Select the number that shows the amount of time you wish to add to your original transaction.

5

Insert coin, cash or credit/debit card. A new receipt will print showing your revised parking time.

If your original parking time has expired, you cannot add time. You'll have to start a new transaction. Please do not exceed posted maximum time limits.
