

## CITY OF BELLINGHAM

### JOB DESCRIPTION

**JOB TITLE:** Information Technology Services Director  
**DEPARTMENT:** Information Technology Services Department

**E-PLAN**  
**SG:**Section 1, Group B  
**CS:**N  
**FLSA:**N  
**EEO4CODE:**OA

#### **JOB SUMMARY:**

Provides leadership, direction, and general administrative oversight to the City department and employees responsible for the development, maintenance and operation of technology services in order to support effective public service delivery. Services include technology planning, business applications support, network and security administration, desktop support, telephone systems support, television station operations, and web services coordination. Work involves significant engagement with the Executive and other City departments and public involvement with elected officials, other policy makers, and citizens. Serving as a member of the City's senior management team, collaborates with the Executive and other City departments on strategy and policy to ensure that the City's mission and core values are incorporated into operational activities and services.

#### **SUPERVISORY RELATIONSHIPS:**

Reports to the Mayor. Works independently under general guidance from the Mayor or designee to ensure coordination of objectives and priorities of the Mayor and Council. Supervises staff directly or through assigned managers. Works under City's policies, procedures, municipal code, and various state and federal regulations.

#### **ESSENTIAL FUNCTIONS OF THE JOB:**

1. **Planning:** Responsible for long- and short-range planning of the City's technology infrastructure and services including disaster/recovery planning. Coordinates with City departments and through the Systems Steering Committee (SSC) to establish priorities for work to be accomplished by the Department.
2. **Fiscal Management:** Develops and administers departmental operating budget and capital budgets related to technology/telecommunications projects. Responsible for computer/technology capital fund management and planning, telecommunications fund, and distribution of costs for services to departments.
3. **Policy and Standards Development:** Develops, and maintains Department and City-wide policies related to technology use and services, maintaining and ensuring compliance. Develops standards and procedures for information technology used throughout the City; including computer software and hardware, data, voice and video networks, systems, programming, documentation, computer operations, and databases within the Information Technology Services Department and other City departments, where applicable.
4. **Personnel Management:** Develops and maintains a workforce committed to, and with highly developed competencies in, customer service, results orientation, and teamwork. Responsible for departmental personnel including position management, work assignments, hiring, training,

- safety, performance appraisal and discipline. Ensures compliance with labor agreements, City-wide and Department policies, and state and federal laws and regulations.
5. Senior Management Team: Provide information and advice to the Mayor and City Council on strategic use of technology and accomplishment of City goals and objectives. Participates in organization-wide strategic planning. Coordinates the Department's activities with those of other City departments to ensure a consistent approach toward common projects and interests and the cost-effective delivery of services.
  6. Systems Steering Committee: Chairs the System Steering Committee (SSC) to recommend City-wide technology initiatives, priorities, and policy; to recommend levels of funding and funding sources for Information Technology Services Department (ITSD) services; to recommend allocation plans for ITSD staff and technical resources; to propose policy, standards and procedures for review and approval; to review and report progress toward defined goals; and to evaluate and report to SSC and systems teams on new technologies.
  7. Network Services and Management: Oversees operation and maintenance of the City-wide LAN/WAN network, including security administration, configuration, environmental controls, and backup/recovery services.
  8. Business Applications Support: Responsible for the systems analysis, design, software engineering/re-engineering and support work for mission critical business software, including financial, human resources, and payroll systems. Responsible for database administration and management. Responsible for e-mail systems security and administration.
  9. Telecommunications Management: Plans, develops, acquires, implements, controls and evaluates the City's telecommunications system including departmental billings and cost allocations.
  10. Desktop/General Technical Services: Responsible for desktop/PC planning and support, project management and consultation services to departments regarding software installation, use, purchase planning, and support. Responsible for major equipment and desktop hardware/software asset management. Provides document scanning and production support for documents available internally and on the City website.
  11. Television Services: Oversees operations of government/education television channel, including filming, content coordination, video production, and broadcast services.
  12. Web/Internet Services: Provides webmaster/coordination services to all City departments; provides technical services, application implementation services, and applications development services related to web-based applications both internal and external.
  13. Training: Responsible for the development and implementation of City-wide staff training in computer, telecommunication and network services through Departmental trainers or consultant contracts.

**ADDITIONAL WORK PERFORMED:**

1. Other duties as assigned by the Mayor

**PERFORMANCE REQUIREMENTS (KNOWLEDGE, SKILLS, AND ABILITIES):****Knowledge of:**

- Contemporary computerized information systems technology including document storage & retrieval, imaging, computer software and hardware, data, video and voice communications equipment and systems, and sources of current information in the field.
- Computer system development methodology.
