

Bunchberry Dogwood

Bleeding Heart

Red Columbine

Red Flowering Currant

Blue Violet

Tiger Lily

Kinnikinnik

Mock Orange

Native Plants for your Northwest Garden

Northwest native plants provide many benefits. Once established, they are drought-resistant, easy to care for, and attractive. They provide food and shelter for birds and wildlife, need less water, and prevent slides and erosion. These plants have adapted over thousands of years to Northwest weather, soil, and topography. When you plant a native plant into the soil, you are replacing a bit of lost flora and lost ecological history.

COMMON NAME	BOTANICAL NAME	TYPE	SUN	SHADE	DRY	DAMP
Vine Maple	<i>Acer circinatum</i>	tree	x	x	x	x
Red-Osier Dogwood	<i>Cornus stolonifera</i>	large shrub	x	x	x	x
