Water Meter and Assembly Box Installation

1. Utilities are located in the right-of-way. Several colors of spray paint appear. The blue stake and white paint indicate where water crews will be digging.

Staff knock
on your door
to let you
know work
will begin.
Your water
service may
be off for up
to an hour.

2. City water crew arrives.

4a. An excavator may dig the hole.

4b. At some sites, crews will dig the hole using shovels.

5. Staff uncovers the water shut off.

6. The water meter resetter gets installed.

7. Staff installs the water meter and checks for leaks.

8. The meter assembly box is placed.

10. The area is cleaned.

9. A lid covers the box, the hole is filled.

11. Staff knocks on your door and leaves a notice of completion.
