

Lakeway and Lincoln Pedestrian-Bike Safety and Mobility

Project Overview: ES-0538

This project proposes to install street markings, hardscape improvements and signals to establish a bike boulevard in the Puget and York neighborhoods. The project will install 4 new High-Intensity CrossWalks (HAWK) signals and on rapid flashing beacon at 5 locations on Samish Way, Lincoln Street and Lakeway Drive. Also included in this work are new sidewalks, ramps, wayfinding, retaining walls and restoration work.

The purpose is to improve mobility and safety for pedestrians and cyclists through these neighborhoods and across key busy arterials.

Status

Accomplishments: Project completed in August 2019.
