

Post Point Wastewater Treatment Plant Improvements

2012 Post Point Up...

Project Overview: EU-0145

The City strives to provide appropriate, safe, [reliable sewer service](#) at a fair, reasonable price while protecting and preserving the environment. As the plant reaches capacity for both load (what arrives in the wastewater) and flow (the quantity of wastewater), we must make improvements and continue to meet wastewater requirements while serving our community safely and effectively in the future.

[Community Involvement](#)

Extensive community outreach and participation

[Permitting](#)

Shoreline, building, and environmental permits

[General Contractor /Contract Management](#)

City approved for alternative contracting method involving preconstruction services to reach final design

[Project Planning Process](#)

The comprehensive facilities planning process

Update - March 2015

Accomplishments: Project complete

Next milestones: Complete NWAPA permit.
