

CITY OF BELLINGHAM

JOB DESCRIPTION

JOB TITLE: Finance Business Systems Analyst

UNION:231

DEPARTMENT: Finance

SG:4

CS:N

FLSA:N

EEO4CODE:PR

NATURE OF WORK:

Responsible for applying a thorough knowledge of department accounting functions to implement, integrate, troubleshoot and maintain the City's financial enterprise software system and workflow, which includes processes and systems that support accounts payable, accounts receivable, accounting, bank reconciliation, budget tracking, fixed assets, general ledger, purchase requisitions, project tracking, related reporting, document tracking, and approvals. Partners with IT and key staff from other City Departments for planning, implementation, and maintenance efforts related to the financial enterprise software system. Works closely with customers, vendors, management and technical staff to analyze, document and identify business and technical solutions to business problems and needs. Works with staff to identify workflow gaps and generates automatic processes and reports from the financial system. Supports and/or develops financial reports; assists in analyzing financial reporting requirements. Identifies and designs process improvements in relationship to financial systems, and related workflow processes and approvals. Trains existing and new staff from all City departments on financial systems.

SUPERVISORY RELATIONSHIPS:

Reports to the Financial System Manager or designee. Works independently under general supervision and the guidance of applicable federal, State and local statutes, regulations, policies, and procedures. May serve as lead on assigned projects, including assigning work to project team members, conducting analysis and outreach to other departments, and providing feedback.

ESSENTIAL FUNCTIONS:

1. Serves as business lead and subject matter expert in department business processes for the implementation of new or revised Financial enterprise software system, processes and related systems and procedures. Provides project leadership, configuration management, testing, and support for assigned financial subsystems. Develops implementation, maintenance, and communication plans. Drafts or revises related policies and procedures. Performs lead responsibilities on an on-going basis for assigned Financial subsystems, including annual project improvements and maintenance.
2. Recommends process/customer service improvements, innovative solutions, policy changes and/or major variations from established policy that must be approved by appropriate leadership prior to implementation. Serves as a key liaison with employees in other departments, third parties, and other stakeholders. Uses project management skills in managing assigned projects. May provide overall project management and business analysis for a given Financial initiative. Assists in identifying and defining systems and process alternatives capable of meeting business needs.

3. Provides end user security management and configuration management for Financial systems. Provides support for configuration changes, work flow changes, and other system process modifications. Participates in change management control of Financial systems. Works with IT Services to control access to Financial systems data. Helps provide support of Financial systems through the IT Services Help Desk.
4. Develops plans and leads staff on the testing and implementation of system upgrades and modifications. Works with Information Technology staff and system vendors to identify and implement upgrades. Assures modifications and upgrades are successfully tested before implementation to the live environment. Reports systems issues to systems vendors and works with vendors to resolve the issues. Documents processes and results.
5. Utilizes standard reporting tools to write, maintain and support a variety of reports or queries. Helps maintain data integrity in systems by running queries and analyzing data. Develops standard reports for ongoing customer needs and ad hoc queries as needed, working with staff to identify information requirements. Works with Information Technology staff to resolve complex reporting issues.
6. Develops and documents work flow processes to create efficiency in the operation of Financial Systems. Works with Information Technology staff to implement complex work flow processes.
7. Plans and provides, or arranges training classes, for staff as needed on the use of Financial Systems. Includes initial training for new users, training on new processes or training to groups on specific functionality. Develops user procedures, guidelines and documentation.
8. Supports best practices for system and process change management, documentation of system processes and business practices, and the development of standards for processes.

ADDITIONAL WORK PERFORMED:

1. Performs other related work of a similar nature or level.

PERFORMANCE REQUIREMENTS (Knowledge, Skills and Abilities):**Knowledge of:**

- Complex systems project management including planning, scheduling, monitoring and problem solving.
