JOB TITLE:	**Permitting System Business Analyst**	UNION:231
		SG: 4
DEPARTMENT:	**Planning & Community Development**	CS:N
		FLSA:N
		EEO4CODE:PR

NATURE OF WORK:

Responsible for implementing, integrating, troubleshooting and maintaining the City's permitting enterprise software system and workflow, which includes processes and systems that support building and land use review and approval. Partners with IT and key staff from other City Departments for planning, implementation, and maintenance efforts related to the enterprise software system. Works closely with customers, vendors, management and technical staff to analyze, document and identify business and technical solutions to business problems and needs. Works with staff to identify workflow gaps and generates automatic processes and reports from the permitting system. Reports permitting data and metrics to department management staff, various outside entities and the public; identifies and designs process improvements in relationship to the permitting system and the public experience with permitting processes and approvals. Trains existing and new staff on permitting systems. Oversees business licensing reporting and public questions.

SUPERVISORY RELATIONSHIPS:

Reports to the Planning Director or designee. Works independently under general supervision and the guidance of applicable federal, State and local statutes, regulations, policies, and procedures. May serve as lead on assigned projects, including assigning work to project team members and providing feedback. May supervise interns, work study students and volunteers.

ESSENTIAL FUNCTIONS:

1.   Acts as department project manager or team leader for the research, development, implementation, and maintenance of the Permitting enterprise software system, processes and related systems and procedures. Develops project and communication plans. Drafts or revises related policies and procedures. Assigned lead responsibilities on an on-going basis for management of Permitting Systems, including annual project and maintenance planning. Monitors project budget, assuring expenditures are within approved budget.

2.   Recommends process/customer service improvements, innovative solutions, policy changes and/or major variations from established policy that must be approved by appropriate leadership prior to implementation. Serves as a key liaison with employees in other departments, third parties, and other stakeholders. Uses project management skills in managing projects. May provide overall project management for a given Permitting initiative. Assists in identifying and defining systems and process alternatives capable of meeting business needs.

3.   Provides end user security management and content management for Permitting systems. Provides support for fee changes, work flow changes, and other system process modifications. Participates in change management control of Permitting systems. Works

with IT Services to control access to Permitting systems data. Helps provide support of Permitting systems through the IT Services Help Desk.

4. Develops plans and leads staff in researching, testing and implementation of system upgrades and modifications. Works with Information Technology staff and system vendors to identify and implement upgrades. Assures modifications and upgrades are successfully tested before implementation to the live environment. Reports systems issues to systems vendors and works with vendors to resolve the issues. Documents processes and results.

5. Utilizes reporting tools to write, maintain and support a variety of reports or queries. Assists in maintaining data integrity in systems by running queries and identifying discrepancies. Develops standard reports for ongoing customer needs and ad hoc queries as needed, working with staff to identify information requirements. Supports departmental goals by analyzing data and developing summary reports. Works with Information Technology staff to resolve complex reporting issues.

6. Develops and documents work flow processes to create efficiency in the operation of Permitting Systems. Works with Information Technology staff to implement complex work flow processes.

7. Plans and provides, or arranges training classes, for staff as needed on the use of Permitting Systems. Includes initial training for new users, training on new processes or training to groups on specific functionality. Develops user procedures, guidelines and documentation.

8. Supports best practices for system and process change management, documentation of system processes and business practices, and development of departmental standards.

9. Maintains current knowledge of trends and developments in the field. Researches and evaluates the use of new applications/technology/standards and equipment at the direction of the Planning and Community Development Director.

ADDITIONAL WORK PERFORMED:

1. Performs other related duties within the scope of the classification.

PERFORMANCE REQUIREMENTS (Knowledge, Skills and Abilities):
